

## A. I. I. N. L. A. (Solution)

From the pictures, it is clear this is about a.i. movies. The first sentence also indicates, the punctuation and spaces in the movie names are irrelevant.

Here is the order of the movies (w/o spaces and punctuation)

1. Moon
2. IRobot
3. WarsGames
4. HitchhikersGuideToTheGalaxy
5. BladeRunner
6. Transcendence
7. TheTerminator
8. AvengersAgeOfUltron

The symbols to the side of the posters represent a binary number where “I” = 1 and “.” = 0. If you decode thus you get a number “k” for each movie. Organize the movies in alphabetical order and get the kth letter in each movie. This spells out ANDROIDS which is the final answer.
